## **Superior Boiler Works Enters Condensing Market with Creek High-Efficiency Condensing Boiler Line**

**HUTCHINSON, Kan. (Jan. 20, 2012)** – In conjunction with the AHR Expo next week in Chicago, Superior Boiler Works, Inc., today announced it is offering a full line of new high-efficiency condensing boilers under the name “Creek.” This boiler line represents the company’s move into the condensing market and will further complement Superior’s other boiler room-related product offerings.

The Creek boilers being offered include standard sizes from 4,000,000 BTU/hr to 12,000,000 BTU/hr at 160 psig design pressure. They will operate at up to 98 percent efficiencies and higher in some cases. The Creek boiler also is available to support applications and installations where low NOx emissions are required.

In making the announcement, Doug Wright, Superior’s president & chief executive officer, said, “Superior Boiler Works is extremely excited to announce the Creek line of boilers to the marketplace. The Creek product line will enhance SBW’s product portfolio and offer a unique opportunity for customers who are looking for exceptional boiler products and value from a proven industry leader. The design, high-efficiency and low emissions of the Creek boiler are backed by our proven standards of workmanship and quality.”

“Superior Boiler Works expects the Creek to be in high demand in certain markets, and we are excited about its prospects,” said Gabriel Dauphin, Superior’s national sales manager. “We are extremely pleased at how efficient and well-engineered the product is for the applications in which it will be used.”
